

# Covansys (India) Private Limited

## Overview

Year after year, enterprises turn to Covansys **Corporation** (Nasdaq:CVNS) for application maintenance and development, public sector solutions and **offshore outsourcing** because they appreciate how our heritage and flexible delivery capability helps them achieve rapid deployment, world-class quality and reduced costs.

Since its inception in 1985, Covansys has rooted itself in high-quality software engineering principles and an unwavering commitment to delivery. These twin strengths enable us to smoothly adapt to the rapid evolution of technology while maintaining constant focus on the changing business needs of our clients. Value is defined by more than a price tag. It's also a matter of trust. Our commitment to service is our promise to meet or exceed expectations everyday and in every **engagement**.

## Flexible Delivery

Covansys blazed a trail in January of 1992 when it became one of the first U.S.-based IT services companies to establish **offshore** facilities in India to provide high-quality and cost-effective services for its clients. Long before it became a **market trend**, Covansys saw the business value that could be unleashed by combining homegrown market knowledge and deep vertical industry expertise with the pure elasticity of outsourcing. An industry leader in successfully integrating offshore capabilities into its service offerings, Covansys pioneered a global delivery model that is transparent, flexible and seamless. Onsite project managers work hand-in-hand with our clients to ensure the successful delivery of offsite and offshore projects. Our 25 locations worldwide, including six development centers, are tied together by a world-class infrastructure built with client satisfaction as its cornerstone.
